Studio BERNINA Design Collection Vol. 7

Project

• Pillow

Pillow in brown

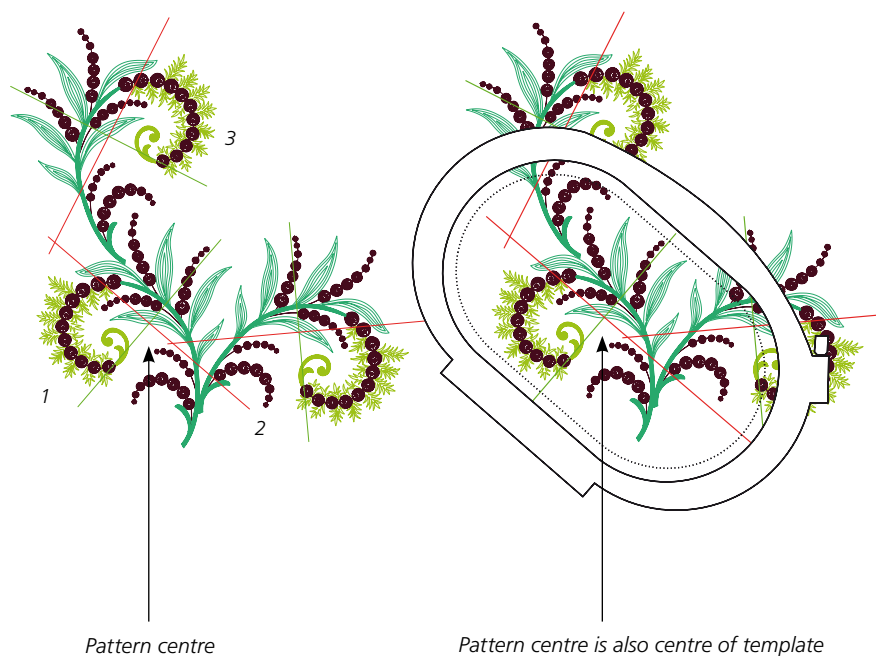

Sewing instructions for a Pillow 50 cm x 50 cm

You will need:

Embroidery design: BE10706

Embroidery hoop: Oval-Hoop

You will also need: See Raw-white pillow

Preparation

The same embroidery design is embroidered three times. Scale the design up to 120 % in the embroidery software. Attach stabiliser to fabric with a little spray adhesive. Print out 3 copies of the enlarged embroidery design in its original size. Generously cut out the printed-out designs and arrange them provisionally on the pillow as it takes your fancy in such a way that the designs don't overlap.

Mark in the centrepoint of the design as well as the vertical and horizontal centre line on the fabric. Hoop the fabric in such a way that the marked centre of the design as well as the vertical and horizontal centre lines coincide with the centre of the oval hoop template. Begin the embroidery with the bottom pattern on the left. Patterns 2 and 3 were mirrored.

Embroider the first design

Rehoop the second design so that the marked lines coincide with the hoop-template lines.

Finishing the pillow:

Place short fabric edges right sides facing and stitch together on both sides for about 6 cm a seam-allowance's width from the edge. Press seam allowance apart and stitch zip into the opening. Turn project inside out and stitch together both side seams a seam-allowance's width from the edge, leaving the zip slightly open for turning.

Pillow in Raw-white

Sewing instructions for a Pillow 50 cm x 50 cm

You will need:

Embroidery design: BE10702

Embroidery hoop: Mega-Hoop

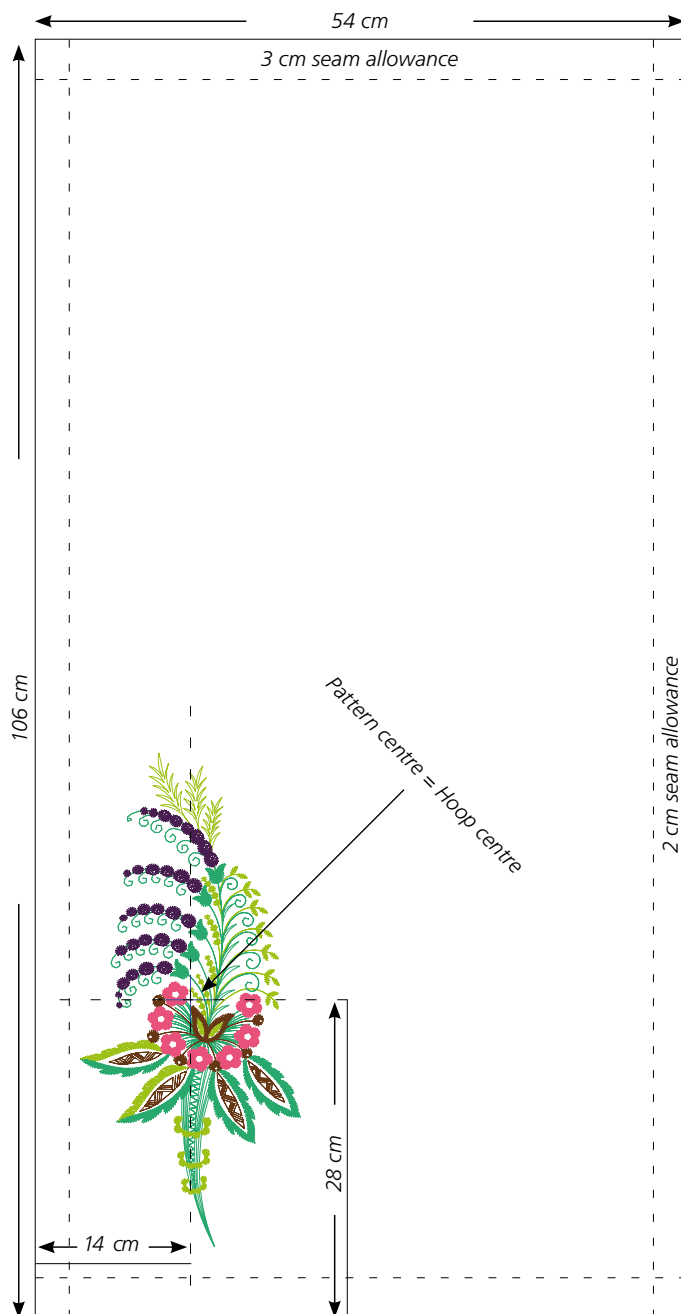

Pillow fabric: 106 cm x 54 cm

Zip: 40 cm

Embroidery thread: See thread colour chart

Embroidery stabiliser: Tear-away

Spray adhesive: 505, **Fabric marker, Ruler**

Mark centre of pattern:

Stick embroidery stabiliser to the fabric with a little spray adhesive. Measure 28 cm from the bottom short fabric edge and mark in a horizontal line. Measure 14 cm from the side with the long fabric edge and mark in a vertical line. Enlarge design BE 10702 to 110 % in the embroidery software or in the machine, then rotate it 15° to the right and centre it.

Hoop fabric in the Mega Hoop so that the marked pattern centre coincides with the centre of the Mega Hoop template. Embroider design and tear away stabiliser.

Finish sewing the pillow:

Place short fabric edges right sides facing and stitch together on both sides for about 6 cm a seam-allowance's width from the edge. Press seam allowance apart and stitch zip into the opening. Turn project inside out and stitch together both side seams a seam-allowance's width from the edge, leaving the zip slightly open for turning.
